DC66P

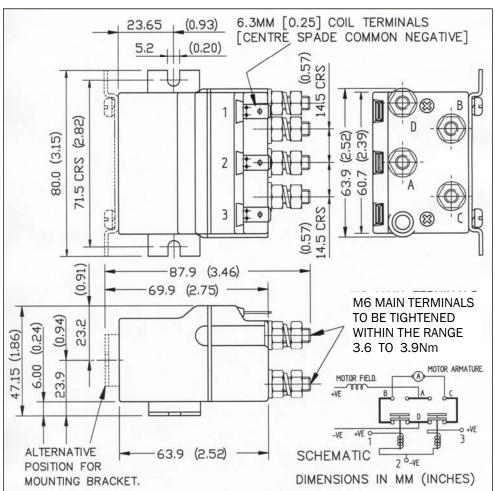

HEAVY DUTY D.C. CONTACTORS FOR ELECTRIC VEHICLES & OTHER HIGH CURRENT APPLICATION

International announces a new addition to the SW60 Allright range of 80 Ampere Contactors: The DC66P.

This compact contactor follows the established design of the monoblock contactors which are configured specifically for motor reversing.

The DC66P is sealed to IP66 standards and is ideally suitable for use with small battery powered winches, vehicle mounted cranes, small electric vehicles, etc.

> These contactor variants are an innovative & unique introduction from the World's leading manufacturer of DC Contactors.

PERFORMANCE DATA

Thermal current Rating (100%):

Up to 80 Ampere

Reduced Duty Cycle Rating:

30% - 150 Ampere 40% - 125 Ampere 50% - 115 Ampere 60% - 105 Ampere 70% - 95 Ampere

Typical Inductive Fault Currents that can be ruptured (5ms time Constant): 500 Amperes at 60V D.C.

Maximum Recommended Contact Voltages: 48V D.C

Typical Voltage Drop across New Contacts:

>3,000,000 **Mechanical Life:**

 Coil Power Dissipation:
 Intermittently Rated Types (50% Duty Cycle):
 10 - 14 Watts

 Intermittently Rated Types (25% Duty Cycle):
 14 - 21 Watts

 Continuously Rated Types:
 5 - 7 Watts

Maximum Pull-in Voltage (Coil at 20EC): Intermittently Rated Types:

60%V Continuously Rated Type:

10-25% Typical Drop-out Voltage:

Typical Pull-in time (n/o contacts to close):

Typical Drop-out time (n/o contacts to Open):
Without Suppression:

Without Suppression: With Diode Suppression: 6ms

Typical Main Contact Changeover Time:
Normally Closed to Normally Open:
Normally Open to Normally Closed:

Typical Contact Bounce Period: 3ms

6ms

Please Note: All Performance provided should be used as a guide only. Some de-rating or variation from these figures may be necessary according to type and application.
